Subject: Structural Repairs - Hamilton Middle School, USD 259, Wichita, Kansas  
Letter of Recommendation

Dear Mr. McCown:

Martin K. Eby Construction would like to recognize the excellent work performed by Power Lift Foundation Repair of Kansas, Inc. on the Hamilton Middle School structural repairs in Wichita, Kansas. Power Lift was contracted to raise the 3<sup>rd</sup> floor cast-in-place slab/beam system that had dropped approximately 6" due to a previous remodel project that was not performed properly on a portion of the building that was constructed in 1918. They also had to support 3 stories and the roof load on both sides of a load-bearing clay tile wall that was required to be completely removed and rebuilt for structural reasons.

The entire project was required to be completed in 9 weeks in order to reopen this portion of the school after the Christmas Break for the 2<sup>nd</sup> semester. The project worked two 12-hour shifts per day and Power Lift's portion of the work was the first portion of work that was required to be completed. Their knowledge and willingness to do what it takes, yet not sacrificing safety or quality, was critical to the overall success of the project.

It is with great pleasure that Martin K. Eby Construction would recommend Power Lift for work associated with shoring and structural lifting. Thanks again for your participation in this project and it is my hope that the relationship established between Eby Construction and Power Lift will lead to successful ventures in the future.

Sincerely,

MARTIN K. EBY CONSTRUCTION CO., INC.

Mike Anderson  
Project Manager
